

Sweet sorghum hybrids bioethanol yield in reclaimed minelands

Diana Bilan, Master, Dnipro State Agrarian and Economic University (DSAEU)

Scientific supervisor: Prof. Mykola Kharytonov, DSAEU

**Tested substrata: black soil (BS)
and loess-like loam, (LLL)
Ukrainian hybrids: Medove and Zubr;
American hybrids: SS506 and Mohawk**

**Conclusion: Ukrainian hybrids cultivation
allow to get more bioethanol yield (l/ha)
comparative to American cultivars**
